

STOCKFORCE

FOR SHEEP HEALTH & PERFORMANCE

NEXT GENERATION SUPPLEMENT.

- ✓ Year-round sheep nutrition, with one dose every 6 weeks
- ✓ 16 amino acids • 9 trace minerals • natural electrolytes – in a single dose.
- ✓ Layers safely over your existing selenium program.
- ✓ No daily handling. No daily dosing. No daily worry.

StockForce is the sheep specialist of the year-round range, and it's built on a simple truth. The things sheep producers chase, from wool cut and fibre strength to fertility, lamb survival and even flocks, are cumulative. They come from a steady, rising plane of nutrition held across the whole year, not a dose at joining and another at lambing. Selenium-free by design, StockForce layers safely on top of an existing selenium program, helping sheep get more from the feed already in front of them and lifting the consistency of the whole flock. Run every six weeks, all year round, it's how a flock gets built.

CORE BENEFITS - StockForce helps support:

Year-round consistency

A steady plane of nutrition across joining, pregnancy, lambing, lactation and the growing phases, not a one-off intervention.

Wool cut & fibre strength

Wool grows every day of the year, so year-round dosing supports tensile strength across the whole staple.

Fertility & reproduction

Better condition going into joining, so females cycle and conceive more reliably, supporting a more even lambing drop.

Lamb survival & growth

Supports lamb survival and stronger growth through the early stages when bone and frame are developing.

Even flocks, fewer tail-enders

Lifts the bottom end of the flock and tightens the spread, with healthier animals at pre-sale.

Selenium-safe

Selenium-free, so it sits alongside your existing selenium program with no risk of doubling up.

- ✓ Every batch NATA tested
- ✓ 3-year shelf life
- ✓ NIL withholding

THE REAL DIFFERENCE - THREE COMPONENTS WORKING TOGETHER

Three components. One rumen-protected formulation. Working in synergy like no other supplement on the market.

Where most sheep supplements stop at trace minerals or lean on urea, StockForce brings amino acids, chelated trace elements and natural electrolytes together. Selenium-free and formulated so sheep absorb and utilise more of everything they consume.

16 AMINO ACIDS

The building blocks for wool, muscle, fertility & tissue repair. Sourced from seagrass & kelp, led by **methionine, serine, lysine & threonine** – methionine and serine build wool keratin, while lysine and threonine underpin muscle growth and gut integrity. Their natural ratio supports absorption in a way synthetic amino acids cannot.

9 TRACE MINERALS

Copper, zinc, cobalt, manganese, boron, magnesium, sulphur & potassium – all chelated for absorption, to support fertility, wool, immune function, hoof & skin integrity. Selenium-free, so it layers safely over an existing selenium program.

NATURAL ELECTROLYTES

The delivery system. Natural fulvic acid electrolytes carry the amino acids & minerals through the rumen & into the cells, supporting hydration, nerve and muscle function while lifting the bioavailability of the whole formulation.

FEWER TAIL-ENDERS. BETTER WOOL. YEAR-ROUND PERFORMANCE.

Wool, fertility and even flocks aren't won in a single week, they're built across the year. Dosed every six weeks, StockForce holds sheep on a steady plane of nutrition through joining, pregnancy, lactation and every day of the wool-growing season, no yarding and no daily handling. Selenium-free, so it works with the program you already run. From around \$2 a head a year, the gains compound, season after season.

DOSE RATES

While StockForce is built for sheep, it can also be used in cattle when you want to avoid adding selenium.

KEY SEASONAL APPLICATION

While it is strongly encouraged to dose every 6 weeks as part of a yearly program for a whole range of benefits for sheep health and performance, if it is not possible then the following are key times to use:

- ✓ **Pre-joining:** Dose 12 weeks before sires go in to ensure 2-3 doses pre-joining.
- ✓ **Late pregnancy:** start 12 weeks pre-lambing and dose every 6 weeks.
- ✓ **Sires:** 3 months pre-joining and then every 6 weeks.
- ✓ **Feed conversion** across both dry and green feed conditions dose once every 6 weeks.

LIVESTOCK	WEIGHT / AGE	DOSE P/H	FREQUENCY
Sheep/goats	Lambs / kids < 30kg	2.5 mL	every 6 weeks
Sheep/goats	Lambs / kids > 30kg	5 mL	every 6 weeks
Sheep/goats	Adult sheep / goats	10 mL	every 6 weeks
Calves on milk based diet	< 60 kg	2.5 mL	every 2 weeks
Calves on milk based diet	61 - 99 kg	3 mL	every 2 weeks
Cattle	100 - 200 kg	20 mL	every 6 weeks
Cattle	201 - 300kg	30 mL	every 6 weeks
Cattle	301 - 400kg	40 mL	every 6 weeks
Cattle	401 kg +	50 mL	every 6 weeks
Cattle	Breeder unit*	50 mL	every 6 weeks

*A heifer you're trying to get in calf, a cow in calf or a cow with calf at foot (to 200 kgs), is classed as a breeder unit.

DOSING MADE SIMPLE

- 1 **Measure:** Measure your dose (e.g. 10ml per head for adult sheep). Never attach the ProDispenser to a full drum of supplement.
- 2 **Fill & connect:** Pour into the DosingDrum, leaving 20% air space, and attach the ProDispenser.
- 3 **Dose:** Place upside down in the trough. The ProDispenser releases slowly over 3 days as water replaces the product.
- 4 **Repeat:** Move to the next water point, or dose again in 6 weeks.

If the water trough application method doesn't suit your operation, StockForce can also be poured on hay or mixed with feed.

ADVANCED NUTRITIONAL SUPPORT

Beyond the trace element profile, this formulation includes bio-synthesised amino acids and natural electrolytes to enhance absorption in the bloodstream, improving nutrient bioavailability and overall effectiveness.

9 x Essential Amino Acids: leucine, isoleucine, valine, lysine, methionine, phenylalanine, threonine, histidine and arginine.

7 x Non-essential Amino Acids: alanine, aspartic acid, glutamic acid, glycine, proline, tyrosine and serine.

MINERAL TARGET ANALYSIS

MINERAL	TARGET	MINERAL	TARGET
Boron (B)	900 mg/L	Potassium (K)	350 mg/L
Cobalt (Co)	3,000 mg/L	Sodium (Na)	750 mg/L
Copper (Cu)	4,000 mg/L	Sulphur (S)	15,000 mg/L
Magnesium (Mg)	2,800 mg/L	Zinc (Zn)	5,300 mg/L
Manganese (Mn)	5,400 mg/L
